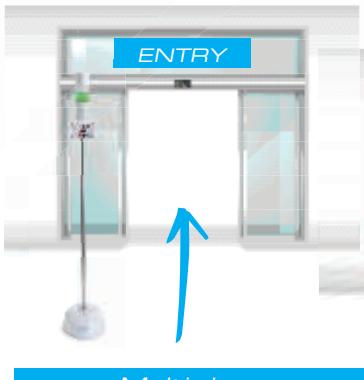
SIRENA

SMART-Q²

Single door access



Multi-door access

SMART-Q²

Crowd management system with automatic detection (working in master-slave mode through radio-frequency) **that allows a visitor counting** without the need to have dedicated staff.

- **double sensor** (infrared and ultrasound) to optimize the counting accuracy;
- dual operating mode for **single door** or **multi-door access**;
- **Battery** power (up to 11 hours of continuous operation) or **mains power supply**;
- It's possible to set the **duration of usage** of the devices to manage people flow;

- It's possible to set the **maximum number of people** who can be present in the room at the same time. When this number will be reached the system light turns red until the number of people inside the room falls below the set threshold.
- Distance between master and slave: min. 1.5m. - max. 50m* (in multi-door mode).
